Instarem/ intern

MAY 15th - JULY 15th 2017

Created a chatbot for Instarem Pvt Ltd. (Singapore based FinTech startup) which would enable an easier flow of communications to the customer support.

Skills acquired:- Dialogflow, Python

Projects

Friendlyoke: *a social networking website*

JANUARY 2009 - DECEMBER 2010

I built a social networking website in ASP.NET, C#, and Telerik. Improved on efficient methods to reduce loading time. The website features included but not limited to the newsfeed, profile, notifications, and entertainment sections for the users. The social networking website was modified and adapted suitably as my school's alumni portal. ([Github](#))

Skills acquired:- ASP.NET, C#, AJAX, Telerik Tools, Jquery

edunova: *an ed-tech platform for students*

AUGUST 2015 - MARCH 2016

Edunova is a social, game-based platform to share educational content and meet with learners having common interests. It is built using Ruby on Rails and Bootstrap.

Awarded third position in Nasscom TechNgage - Pune, a cash prize of 1 Lac INR was given as a reward by NASSCOM. ([Github](#))

Skills acquired: Ruby on Rails, Ruby, MVC, Bootstrap, JQuery

MathBot Tutor: *bot that helps you learn and practise math*

SEPTEMBER 2017 - current

Built an artificially intelligent chatbot to generate multiple choice questions. Answers were fetched using wolfram alpha API. The chatbot was built for facebook messenger and is live at m.me/mathtutorbot. It has 5K + users as of 1st Jan'18 and 6K likes on its' [facebook page](#).
