SKILLS

PROGRAMMING

Over 5000 lines:

Ruby • Shell • JavaScript • Rails

C++ • Python

Over 1000 lines:

C • Solidity • CSS • Keras • NET

Familiar:

Tensorflow • MongoDB • Flask • Django

INTERESTS

- Swimming • Chess • Reading • Natural Language Processing • Machine Learning
- Writing • Table Tennis • Startups

COURSES

- fast.ai Deep Learning Course • Structure and Interpretation of Computer Programs Stanford

SELECTED PROJECTS

- | | | |
|------|--|--|
| 2013 | friendlyoke.com | It is a social website that enables friends to connect with each other and watch videos, read comics and play games in an interactive manner along with friends. Built on top of ASP.NET and Telerik. |
| 2016 | edunova.io | edunova.io is social, game based educational platform which helps students connect and explore new topics. It enables students to learn new things together and discover what they truly like. It used machine learning in games to personalize the learning experience. Built on top of Ruby on Rails |
| 2018 | PDFBot Assistant | Created a Bi Directional Recurrent Neural Network which results in improved question answering from the passage provided (machine comprehension). The user can upload a PDF and ask a question from the PDF and get appropriate answers. |

EXPERIENCE

CHATURBOTS | FOUNDER

Jan 2018 – Dec 2018

- Built a NLP powered chatbot platform to assist customer support.
- Incubated by ASHINE (Entrepreneurship Cell, SVNIT) and received seed grant for my startup (50K).
- Selected by Google Cloud Startups (3000 USD) and DigitalOcean Hatch(500 USD) and received platform credits.
- Selected in Vibrant Gujarat Summit and attended Nasscom Product Conclave.
- Built the product MathBot Tutor (fb.com/mathtutorbot). It is a digital assistant that helps student learn and practise mathematics. It has over 10,000 users and 6000+ facebook likes. It was selected by fbStart and has received 40K USD in credits from fbStart partners.

INSTAREM | SOFTWARE ENGINEERING INTERN

May 2017 – July 2017 | Mumbai, Maharashtra

- Built a chatbot on top of dialogflow with live chat backdrop.
- Integration of multiple features provided by Instarem were present on the chatbot.
- It enabled easier flow of communication and automation to repetitive tasks done by customer support team.
